

K06QL-D
Environmental Statement
March 30, 2022

The applicant proposes to operate at 3 kW horizontally polarized at a height above ground of 62 meters. This proposal is well within both the controlled and uncontrolled radiation exposure guidelines. Furthermore, the tower site is completely fenced. The proposed antenna is a Scala CL-46 log periodic antenna which additionally has very little downward radiation. Nevertheless, station personnel will be trained how to turn off the transmitter in the event that anyone climbs the tower. Additionally, placards warning of radiation hazard are posted in and around the site at all time.
