

DECLARATION

Charles Poppen, President of G.I.G., Inc., licensee of KCPM-LP, Fargo, North Dakota (Facility ID No. 21187), hereby states the following under penalty of perjury:

The Commission's February 8, 2022 letter questions the operational status of KCPM. In this regard, the following should be noted. Throughout most of the license term, KCPM has been struggling under extraordinary financial constraints. The Fargo, North Dakota market has been challenging. Furthermore, I have had some health issues which further presented challenges to keep the station operational.

Attached to the instant Declaration is a Digital Companion Channel application (Attachment A). This was filed on July 8, 2021. It was filed at my direction by my then consulting engineer, Jeremy Ruck. After it was filed, Mr. Ruck advised me that I could commence broadcasting digitally, which I did. I have subsequently found out that that application is still pending. I was not aware of that, and I am puzzled by why Mr. Ruck told me that I could commence broadcasting in digital mode shortly after that application was filed. In point of fact, digital operations commenced on July 11, 2021. I am unable to provide anything from Mr. Ruck, since he died from COVID in December of 2021.

Attached is a photograph showing the digital construction of the station at its current site atop the Radisson Hotel (Attachment B). Also attached is a record of payments for the antenna site at the Radisson Hotel for 2021 and 2022 (*See Attachments C and D*).

I have also attached documentation for 2022 demonstrating programming logs (Attachment E).

Finally, attached is a Declaration of Kent Lien recounting his viewership of programming being broadcast on the station in February 2021 and February 2022 (Attachment F).

I wish to apologize for the irregularities which I have noted relative to the operation of KCPM. However, it is my full intention to keep the station on the air and to continue broadcasting.

Charles Poppen

APPLICATION FOR CONSTRUCTION PERMIT

The following engineering statement and attached exhibits have been prepared for **G.I.G., Inc.** ("GIG"), licensee of analog low power television station KCPM-LP (formerly KVNJ-LP) at Fargo, North Dakota, and are in support of their application for construction permit for a new digital companion channel low power television facility at Fargo, North Dakota. The Facility ID for the current analog facility is 21187, and is licensed under FCC File No. BLTVL-20020207AAQ.

KCPM-LP is licensed as an analog low-power television station on channel 2 at a center of radiation of 337 meters above mean sea level, 61 meters above ground level, with a maximum effective radiated power of 1.13 kW utilizing a directional antenna. The proposed digital companion channel facility would be located at a site that is different from that specified under the current license. It is proposed that the digital companion channel facility operate on channel 23 with a maximum effective radiated power of 0.700 kW at a center of radiation of 344.5 meters above mean sea level, 69.5 meters above ground level, utilizing a non-directional antenna.

Exhibit E-1 makes a comparison between the proposed and licensed service contours. This map demonstrates that the licensed 62 dBu F(50,50) service contour is wholly contained within the proposed 51 dBu F(50,90) service contours. Additionally, as is demonstrated by this map, the proposed transmitter site located within 30 miles of the licensed transmitter site.

The proposed technical parameters would not result in interference to other proposed, authorized, or licensed facilities in excess of that permitted under the Commission's Rules. Exhibit E-2 is the tabular output from *TVStudy*. This study demonstrates no interference check failures.

The proposed facility would not constitute a significant environmental impact, and is exempt from processing. The proposed antenna would be located at an existing structure that is registered with the Commission.¹ The registered structure is a high rise building in Fargo, that serves as the communications platform for several other communications tenants.

The proposed facility would not constitute a significant environmental impact, and is exempt from environmental processing. The proposed antenna would be mounted to an existing tower that is registered with the Commission. The addition of the antenna to this tower would not increase the existing environmental impact already present from the tower. The rooftop of this building functions as a controlled environment. With regard to persons at ground level, the worst-case power density there assuming a downward radiation relative field of 0.2 is 0.205 $\mu\text{W}/\text{cm}^2$. This value is significantly less than that permitted as the upper limit under the uncontrolled environment condition of the Commission's safety standard. This value was calculated assuming a height of 2 meters above ground level.

The output from *TVStudy* also demonstrates that the predicted 24.66 dBu interfering contour does not cross the Canadian border. Thus, coordination with Industry Canada does not appear necessary. The proposed facility is located at a significant distance from the Grand Island, Nebraska FCC monitoring station, and is not located within the West Virginia quiet zone or the Table Mountain receiving zone.

¹ See Antenna Structure Registration Number 1252428.

The preceding statement and attached exhibits have been prepared by me, or under my direction, and are true and accurate to the best of my belief and knowledge.

DECLARATION

My name is Kent Lien. I hereby state, under penalty of perjury, the following:

On February 5th and 6th, I have viewed the broadcast operation of KCPM on my television set located at 1111 11th Ave. South, Fargo, North Dakota, 58103. I do remember viewing the station in particular. It was broadcasting Wild America, Wild Dakota as well as children's educational programming. This is similar to programming I noticed seeing last February as well.
