

PROPOSED MINOR CHANGE
License LMS- 0000121262
K207FF (FX) Big Spring TX
FACID 92372

TECHNICAL STATEMENTS

This instant application requests a modification of this translator facility at the licensed location and height on an Intermediate Frequency authorized operating channel and to a modified Effective Radiated Power. The proposed facility will provide fill-in service for the non-commercial educational station KRGK, FACID 466480 HD-2 channel, which is collocated on the tower and combined with this proposed translator facility. As such, the primary station contour equals that of the fill-in translator.

CONTOUR OVERLAP REQUIREMENTS

The attached map of contours depicts the proposed allocation situation with respect to all pertinent co-channel and adjacent channel facilities. All facilities have been depicted utilizing either the maximum ERP or directional pattern data as on file with the commission. AAT data for the proposed facility was derived from the FCC's 30 second database, *ComStudy*. There is no prohibited overlap created as a result of this proposal to any facility in the allocation landscape.
