

## NATURE OF AMENDMENT

1. Advancement of Educational Program Addendum Attachment added.
2. Tower Representative Contact Addendum Attachment added.
3. AGL of antenna (antenna location remains the same) is amended, thus changing COR and HAAT. To maintain the same contour, then ERP was also changed. No comparative consideration was enhanced. Below demonstrates the first application's 60 dBu contour in CYAN and this application's proposed 60 dBu contour in RED.
