Reduced Power Notification

KHOU-TV, Inc., licensee of television station KTBU, Conroe, Texas, hereby notifies the Commission that KTBU is operating at 10% of its licensed power due to the failure of the combined antenna system KTBU shares with several other local stations. The antenna system failed on May 7, 2022, causing KTBU to go silent. American Tower, which manages and maintains the tower on which the antenna system is mounted, believes the failure to be the result of a lightning strike occurring during storms two days earlier. KTBU's over-the-air service was restored at 10% power on the evening of May 8, 2022. American Tower is in the process of assessing the full extent of the damage and developing a plan for repairs.
