Explanation of FM License to Cover Filing and Compliance with Special Operating Conditions or Restrictions

1. The applicant certifies coordination with other users of the site to reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic fields in excess of FCC guidelines.
5. The applicant acknowledges it previously specified use of an ERI Model MPX-4C (EPA Type 3: Opposed U Dipole), four (4) sectioned, circularly polarized, nondirectional, FM transmitting antenna with one wavelength bay spacing to demonstrate compliance with the FCC radiofrequency electromagnetic field exposure guidelines. As no other type or size of antenna has been used with the facilities authorized herein, the automatic program test provisions of 47 C.F.R. Section 73.1620 continue to apply. In this case, no formal request for Program Test Authority need be filed in conjunction with this FCC License to Cover Application, nor are any further RF field showings required.
