

WORD OF GOD FOUNDATION, INC.
Application for License Renewal

PUBLIC INSPECTION FILE

During the most recent license term, station KUTF, Logan, Utah (“Station”) has provided viewers in its community of license and the surrounding areas with excellent public affairs programming aimed at diverse audiences, including news, weather, sports, emergency information and other important current events, as set forth on the Station’s quarterly issues/programs lists.

Due to simple administrative oversight, the Station’s issues/programs lists for Q1 2014, Q2 2014, Q4 2016, and Q2 2018, and the Commercial Limits Certification for Q3 2015, were not uploaded on time to the Station’s online public inspection file (“OPIF”). However, importantly, Word of God Foundation, Inc. (“WOGF”), the licensee of the Station, has not received any queries or complaints from any member of the public concerning the Station’s programming or the contents of its public inspection file associated with the quarters in which the issues/programs lists (and the Commercial Limits Certification) were uploaded late (or, indeed, during any part of the Station’s most recent license term). As set forth herein, the reported errors were simply ministerial. In addition, it should be noted that WOGF has uploaded the issues/programs lists and the Commercial Limits Certifications to the Station’s OPIF on time **during every other quarter** of the Station’s preceding eight-year license term.

In summary, WOGF has been in overwhelming compliance with the Commission’s rules during the Station’s preceding license term. Accordingly, WOGF submits that no Commission action is warranted, and that grant of this license renewal application would serve the public interest, convenience and necessity.
