

Educational Media Foundation
5700 West Oaks Boulevard
Rocklin, CA 95765

WOHK
Ashtabula, OH

Justification for Extraordinary Circumstances

Educational Media Foundation (EMF) respectfully requests a variance from the WOHK licensed parameters. It has been discovered that the Antenna Structure Registration geographic coordinates vary from the licensed parameters.

Since the station licensed coordinates differ from the Antenna Structure Registration coordinates by less than 3 seconds, an application for a construction permit is normally not required. It has also been noted the site elevation has changed. While no change to the Center of Radiation above ground has occurred, the resulting change in the Center of Radiation Above Mean Sea Level is higher than the licensed figure by 3.8 meters. Since this change is greater than the ± 4 meter FCC allowance, a minor modification application has been filed to correct both the WOHK geographic coordinates and center of radiation above mean sea level. EMF will file a subsequent license to cover the granted CP in a timely manner.

EMF believes that Special Temporary Authorization to operate WOHK in accordance with this Engineering STA is in the public interest in that the listeners who rely on the programming of WOHK will continue to receive this facilities programming while awaiting a grant of the construction permit and subsequent license.
