

### **Commercial Status**

The applicant requests that it be authorized as a commercial station.

As stated in the Comprehensive Technical Statement included in the application for construction permit, W277BI will be operated commercially, with WTOD (FM) HD-2 as the primary station.

W277BI previously was operating as a Non-Commercial Educational facility, and it is listed in LMS as such. There does not appear to be a way for a web user to remedy this manually in LMS. Therefore, the applicant previously requested in the CP application that the FCC manually change W277BI to Commercial status and hereby requests that its status be updated.
