

PROPOSED MINOR CHANGE
License LMS- 0000163164
K230CI (FX) Carlsbad NM FACID 202110

TECHNICAL STATEMENTS

This instant application requests a modification of this translator facility an alternate height with the licensed Effective Radiated Power the authorized operating channel on the authorized location. The proposed facility will continue to repeat the commonly-owned Primary AM Station.

The facility has been operating under Special Temporary Authority following damage to the tower structure, this will provide a permanent operation for the translator, and it will be combined with commonly owned translator station K242DB, an application for which is being filed simultaneously with this instant request.

There is no caused or received interference in the allocation landscape as a result of this proposal.

The translator is a fill-in for the AM primary station currently authorized, KATK (AM) which is collocated with this proposal; thus the proposed 60dBu contour is fully within the required 25-mile distance from the AM station tower.
