

**AMENDMENT TO RENEWAL APPLICATION (W230CP ONLY)**

W230CP at Pittsfield, MA (Facility ID 153531) has suspended operation as of March 7, 2022 due to technical issues that occurred sometime prior to turning off the 1 Watt facility. Apparently a failure of the audio input circuitry led to a loss of audio input from from the primary station, as well as from the associated CW ID generator.

The applicant is concurrently filing a request for a Silent STA via e-mail, and will file a Notice of Resumption of Operations once the facility is restored to operation.
