

Written Agreements

No written agreement or series of agreements exist that are intended to effect a transfer of control of 50% or more of the voting interests in the licensees for which applications are concurrently submitted with this application. See Description of the Transaction Exhibit. Several intra-company agreements among owners and/or lenders are listed below that relate to the transactions reflected in the Description of the Transaction. Copies of the agreements listed below were previously made available to FCC staff. Licensees have pledged all of their assets and the parents of the licensees have pledged all of the membership interests in the licensees, under long-standing loan agreements, which agreements specifically exclude from the pledge all FCC licenses authorizations and permits that require the prior consent of the FCC to such pledge unless such consent from the FCC has been obtained. Some of the parties to the agreements listed below are affiliated with the licensees' lenders. The agreements listed below did not create pledges or modify or otherwise affect the existing pledge agreements.
