

REQUEST FOR SPECIAL TEMPORARY AUTHORITY

KRJN (FM) Log Lane Village CO
FACID 170963

Northeast Colorado Broadcasting, LLC, licensee of KRJN (FM), seeks continued Special Temporary Authority to operate the station from an alternate location. This filing in LMS replaces CDBS filing BSTA-20201222AAA which fully describes the technical parameters of the station:

Site Location: 40-14-58.6 N 103-47-59.6 W (NAD 83)
Effective Radiated Power: 0 kW Horiz. ; 0.6 kW Vert.
Antenna Center HAAT: 0 m Horiz.; 1 m Vert.
Antenna Center AMSL: 0 m Horiz.; 1334 m Vert.
Antenna Center HAG: 0 m Horiz.; 14 m Vert.
Site Elevation: 1320.3m.
Height Overall: 15 m (49 ft.)

The STA operation is required because of total loss of the main antenna system and the expiration of the underlying tower lease at the licensed site. The licensee has obtained Construction Permit LMS-0000136287 which specifies a combined operation with commonly-owned KPRB (FM). Much of the equipment is on hand for the construction, but supply chain disruptions and extremely long lead times of delivery from manufacturers has delayed the completion of the construction.

The public interest is served by allowing KRJN(FM) to continue to broadcast from the temporary facilities. The Construction Permit will be executed at the soonest possible opportunity and license to cover filed thereafter.
