

Woodchuck Radio, LLC
WEXP(FM), Brandon, VT
Facility Id. No. 64961
July 2022

Request for Engineering STA

On July 8, 2021, WEXP went off the air due to a faulty transmitter. Woodchuck Radio received FCC approval to remain silent (File No. BLSTA020210902AAD).

On June 30, 2022, WEXP resumed operations. The transmitter was replaced; however, it was determined the antenna specified in the license for WEXP is damaged and unstable. Woodchuck Radio has installed an emergency antenna operating with parameters described elsewhere in this application that does not exceed the licensed contours for WEXP.

Woodchuck Radio is considering options either to repair or replace the damaged antenna in order to bring the operation of the station into compliance with the licensed facilities for WEXP. Approval of this request for an Engineering STA will serve the public interest by allowing WEXP to resume operations and avoid automatic cancellation of the license.
