

Attachment – Application information

The sole purpose of this Minor Modification is to return the translator facility W259DK back to its original tower site which is co-located at the AM tower site. W259DK is under assignment of license from Courington and Mastin, LLC to Joy Christian Ministries. The assignee does not have access to the assignor’s tower location and wishes to put it back where it was originally granted its Construction Permit.

AM and Translator Assignment

Since WQRX-AM and W259DK are being processed together on the license assignment, and since we have no guarantee of the grant of the main assignment, this application should be treated as “subject to the approval of license assignment application# 0000194268, and should only be granted when and if that assignment is granted by the FCC.

NCE Operations:

The rebroadcast source, WQRX-AM, facility 60648, is also part of this license assignment application and we have filed a form 302-AM for the purpose of converting this commercial license to NCE. Therefore, this translator will also be NCE. There is no place on the form to note this change; thus the reason for this request as part of this attachment.

Frequency Change request:

The original frequency on the CP was 99.3, channel 257.

The operating frequency and the minor modification filed by the Assignor on our current assignment of license (File# 0000194268) was granted on June 2, 2022; after the grant of a minor modification and subsequent grant of the W259DK broadcast license. In that Minor Modification, they changed the frequency to 99.7, channel 259.

The CP and the current study shows the that the original frequency of 99.3 works with our minor modification information, thus we request a channel change back to its original channel to 257, 99.3 FM.
