July 15, 2022

SUPPLEMENTAL EXHIBIT

The proposed facility antenna is located within 3.2 km of AM directional stations KPFS & KXPS (both located on the same tower). The proposed antenna is being located at an existing tower which has no AM station located on the tower and the height of the tower is not being increased as a result of the addition of the antenna. Therefore there is no impact to the AM stations listed above directional patterns and as a result of this, no analysis is supplied with the minor modification application.

Sincerely,

A handwritten signature in black ink that reads "Greg Best, PE". The signature is written in a cursive, flowing style.

President
