

Exhibit 1
Public Inspection File

The licensee regularly and timely posts required materials in the station's public inspection file, including political advertising documentation. Political orders received on a Friday are generally posted the next business day. In certain instances, the political advertising documentation was not posted "immediately," as interpreted by the FCC, but was typically posted within several business days. The licensee has emphasized the importance of timely posting and has provided additional training to station personnel.

The annual EEO Public File Report required to be posted on Monday, August 2, 2021, was posted on Tuesday, August 3, 2021, due to the FCC's Public Inspection website not functioning.
