Hi Mark,

We would like to change the community of license for KVHC-LD from Kerrville TX to San Antonio.

It has been quite the project to get back on the air. The power company pulled the new, replacement lines a month ago but then we needed to get a new address from the City since the power was in a new gang. We have escorts confirmed from July 20-22 so our electricians can redo the wiring for the new service. (You need an escort to work on the power company property and they are scheduling three weeks out.) After the electricians, we request the meter, and then the electricians return to hook us up to the meter. Then the magic occurs. This is killing me as I have sub-channels ready to get on the air and my tower rent keeps coming due every month.

Thanks

Frank
