

## ENGINEERING EXHIBIT

### Digital Low Power Television Station Application for Minor Modification of Licensed Facility

prepared for

**Gray Television Licensee, LLC**  
WMJN-LD Huntsville, AL  
Facility ID 10593  
Ch. 32 15 kW Directional

*Gray Television Licensee, LLC* (“*Gray*”) is the licensee of digital Low Power Television station WMJN-LD, Channel 32, Facility ID 10593, Huntsville AL. WMJN-LD is licensed to operate at 15 kW effective radiated power (“ERP”) with a nondirectional antenna (file# 0000130267). *Gray* herein seeks a minor modification Construction Permit to relocate WMJN-LD and to utilize a directional antenna at increased antenna height.

The proposed facility will employ an existing broadband antenna that is side-mounted on the tower structure associated with FCC Antenna Structure Registration number 1204889, located 36.2 km (22.5 miles) from the licensed site. No change to the overall structure height is proposed. The antenna supporting structure is utilized by *Gray*’s full-service television station WAFF (Facility ID 591, Huntsville AL). The broadband antenna was previously utilized by WAFF as an interim antenna in 2020 during WAFF’s transition to its reassignment channel (file# 0000105855).

The broadband antenna is a Dielectric model TFU-8WB-R C160 having horizontal polarization. The proposed ERP is 15 kW using a “full service” out of channel emission mask. A plot of the directional antenna’s azimuthal pattern on Channel 32 is supplied in Figure 1. Figure 2 depicts the coverage contour of the proposed facility as well as that of the licensed facility, demonstrating compliance with §73.3572 for a minor change.

Interference study per OET Bulletin 69<sup>1</sup> shows that the proposal complies with the FCC's interference protection requirements toward all digital television, television translator, LPTV, and Class A stations. The results, summarized in Table 1, show that any new interference does not exceed the FCC's interference limits (0.5 percent to full power and Class A stations, and 2.0 percent to secondary stations) to any facility.

### **Human Exposure to Radiofrequency Electromagnetic Field (Environmental)**

The proposed facility was evaluated for human exposure to RF energy using the procedures outlined in the FCC's OET Bulletin Number 65. Based on OET-65 equation (10) and 20 percent antenna relative field in downward elevations (pattern data shows 20 percent or less relative field at angles 20 to 90 degrees below the antenna), the calculated power density attributable to the proposed facility at locations near the transmitter site at a height of two meters above ground level is  $0.1 \mu\text{W/cm}^2$ , which is 0.03 percent of the general population / uncontrolled maximum permissible exposure limit. This is well below the five percent threshold limit described in §1.1307(b) regarding sites with multiple emitters, categorically excluding the applicant from responsibility for taking any corrective action in the areas where the proposal's contribution is less than five percent.

The general public will not be exposed to RF levels attributable to the proposal in excess of the FCC's guidelines. RF exposure warning signs will continue to be posted. With respect to worker safety, the applicant will coordinate exposure procedures with all pertinent stations and will reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from RF electromagnetic field exposure in excess of FCC guidelines. This exhibit is limited to the evaluation of exposure to RF electromagnetic field. No increase in structure height is proposed.

---

<sup>1</sup>FCC Office of Engineering and Technology Bulletin number 69, *Longley-Rice Methodology for Evaluating TV Coverage and Interference*, February 6, 2004 ("OET-69"). This analysis employed the FCC's current "TVStudy" software with the default application processing template settings, 1 km cell size, and 1 km terrain increment. Comparisons of various results of this computer program (run on a Mac processor) to the FCCs implementation of TVStudy show excellent correlation.

**Channel and Facility Information**

Section	Question	Response
Facility ID	10593	
State	Alabama	
City	Huntsville	
LPD Channel	32	

Section	Question	Response
<b>Antenna Location Data</b>	Antenna Structure Registration	Do you have an FCC Antenna Structure Registration (ASR) Number?
		Yes
<b>Coordinates (NAD83)</b>	ASR Number	1204889
	Latitude	34° 42' 39.3" N+
	Longitude	086° 32' 07.0" W-
	Structure Type	GTOWER-Guyed Structure Used for Communication Purposes
	Overall Structure Height	460.1 meters
	Support Structure Height	447.1 meters
<b>Antenna Data</b>	Ground Elevation (AMSL)	351.2 meters
	Height of Radiation Center Above Ground Level	392.3 meters
	Height of Radiation Center Above Mean Sea Level	743.5 meters
	Effective Radiated Power	15 kW

Antenna Technical Data	Section	Question	Response
	Antenna Type	Antenna Type	Directional Custom
		Do you have an Antenna ID?	No
		Antenna ID	
	Antenna Manufacturer and Model	Manufacturer:	Dielectric
		Model	TFU-8WB-R C160
		Rotation	285 degrees
		Electrical Beam Tilt	1.05
		Mechanical Beam Tilt	Not Applicable
		toward azimuth	
		Polarization	Horizontal
	Elevation Radiation Pattern	Does the proposed antenna propose elevation radiation patterns that vary with azimuth for reasons other than the use of mechanical beam tilt?	No
		Uploaded file for elevation antenna (or radiation) pattern data	
		Out-of-Channel Emission Mask:	Full Service

#### Directional Antenna Relative Field Values (Pre-rotated Pattern)

Degree	Value	Degree	Value	Degree	Value	Degree	Value
0	0.772	90	0.880	180	0.614	270	0.875
10	0.787	100	0.830	190	0.567	280	0.922
20	0.828	110	0.763	200	0.448	290	0.965
30	0.889	120	0.659	210	0.337	300	0.991
40	0.951	130	0.517	220	0.369	310	0.985
50	0.992	140	0.374	230	0.513	320	0.946
60	0.998	150	0.340	240	0.657	330	0.885
