

**STATEMENT OF WILLIAM J. GETZ
IN SUPPORT OF AN APPLICATION
FOR CONSENT TO ASSIGNMENT
OF BROADCAST LICENSE**

I am a Radio Engineer, an employee in the firm of Carl T. Jones Corporation, with offices located in Springfield, Virginia. My education and experience are a matter of record with the Federal Communications Commission. This office has been authorized by the Applicant to prepare this statement and the associated exhibits in support of an Application for Consent to Assignment of Broadcast License in order to acquire the following full-service radio stations:

- KSMX-FM, Clovis, NM (Facility ID 64495)
- KRMQ-FM, Clovis, NM (Facility ID 84330)
- KSEL-FM, Portales, NM (Facility ID 4816)
- KSEL(AM), Portales, NM (Facility ID 4815)

Exhibit A depicts the principal community contours of the proposed station acquisitions, all licensed to a community located outside of a Nielsen Radio Metro Area. The applicant currently holds no attributable interest in any other nearby stations. Accordingly, this material demonstrates that the common ownership of the stations listed above is compliant with Section 73.3555 of the FCC Rules as it applies to the contour-defined radio market.

Multiple Ownership Contour-Defined Market Analysis

Exhibit B depicts the four-station radio market (3 FM/1 AM) as defined by the total principal community contour area of KSMX-FM, KRMQ-FM, KSEL-FM and KSEL(AM) [i.e. the "Subject Stations"] and the principal community contours for the other stations, in which the

STATEMENT OF WILLIAM J. GETZ
PAGE 2 OF 2

Applicant holds no attributable interest, which are counted in the contour-defined radio market.¹ Table 1 contains each station's call sign, city of license, state, channel of operation, and technical facilities.

As stated above, the applicant will own or control 3 FM stations and 1 AM station in the contour-defined radio market. Pursuant to Section 73.3555(a)(1)(iv) of the FCC Rules, the applicant is permitted to own four radio stations (three in the same service) provided the market contains at least four other stations in which the applicant holds no cognizable interest (the applicant cannot have cognizable interest in more than 50% of the market stations). As shown in Exhibit B, the contour-defined radio market contains at least 13 operating commercial or noncommercial radio stations [defined by the city-grade contours of the 4 subject stations and the overlapping city-grade contours of at least 9 other stations in which the applicant holds no attributable interest]. Accordingly, the proposed station acquisitions result in a combination of stations which satisfies the multiple ownership criteria set forth in Section 73.3555 of the FCC Rules.

This statement and the supporting Exhibits and Table were prepared by me or under my direct supervision and are believed to be true and correct.

DATED: August 5, 2022

William J. Getz

¹ For the FM stations considered herein, the principal community contour is the predicted 3.16 mV/m (70 dBu) contour computed in accordance with Section 73.313 of the FCC Rules. For the AM stations considered herein, the principal community contour is the predicted daytime 5.0 mV/m groundwave contour computed in accordance with Section 73.183 of the FCC Rules. All stations represented herein are operating full service commercial or noncommercial radio stations and operate from transmitter sites located within 92 kilometers of the perimeter of the Subject Station's mutual principal community contour overlap area.
