

Booster Non-Interference With Community of License

ASR# 1000401, 15m, 265W, Channel 298, CL-FM(V) @ 309°

The 40 dBμ Longley Rice Contour does not overlap, Superior, City of license for primary KENR. Longley Rice Contours were used to demonstrate non-interference with the city of license because Superior is terrain shielded by mountains between Superior and the transmit site for KENR-FM1.
