

PROPOSED MINOR CHANGE
License BLFT-20120613ABA
W232CF (FX) Fort Walton Beach FL FACID 145151

TECHNICAL STATEMENTS

This instant application requests a modification of this translator facility an alternate tower location and height with an increased Effective Radiated Power the authorized operating channel on a tower location owned by the licensee. The proposed facility will repeat the HD-2 Channel of the commonly-owned Primary FM Station.

There is no caused or received interference in the allocation landscape as a result of this proposal.

The translator is a fill-in for the HD-2 channel of the FM primary station, WTKE-FM which is collocated on the same tower site; thus the proposed 60dBu contour is fully within the required 60dBu (50,50) contour of the primary station.
