ENGINEERING AFFIDAVIT

State of Ohio)
) ss:
County of Summit)

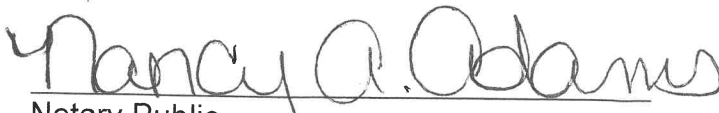

Roy P. Stype, III, being duly sworn, deposes and states that he is a graduate Electrical Engineer, a qualified and experienced Communications Consulting Engineer whose works are a matter of record with the Federal Communications Commission and that he is a member of the Firm of "Carl E. Smith Consulting Engineers" located at 2324 North Cleveland-Massillon Road in the Township of Bath, County of Summit, State of Ohio, and that the Firm has been retained by Starcom, LLC to prepare the attached "Engineering Statement in Support of Request for Program Test Authority - Construction Permit 0000141562 - WCMN-LD - St. Cloud-Sartell, MN".

The deponent states that the Exhibit was prepared by him or under his direction and is true of his own knowledge, except as to statements made on information and belief and as to such statements, he believes them to be true.

Roy P. Stype, III

Subscribed and sworn to before me on **December 29, 2021**.

ENGINEERING STATEMENT

This engineering statement is prepared on behalf of Starcom, LLC, licensee of Low Power TV Station WCMN-LP - St. Cloud-Sartell, Minnesota and permittee of construction permit 0000141562 for digital companion channel station WCMN-LD. WCMN-LP was licensed for analog operation on Channel 13, but ceased operation on July 12, 2021 to comply with the requirement that all analog LPTV stations cease operation by that date. WCMN-LD's digital companion channel construction permit authorizes operation on Channel 14 with a nondirectional effective radiated power of 15 kilowatts.

Equipment tests of the WCMN-LD Channel 14 facility began on December 8, 2021. These equipment tests were conducted using Nextgen ATSC-3 TV transmissions since WCMN-LD intends to commence operation using Nextgen technology and modify its license to reflect this mode of operation as soon as it has been granted. As required by the special operating condition on the construction permit, Starcom undertook the necessary steps to ensure that land mobile radio users in the 460-470 MHZ band are protected from interference from the WCMN-LD Channel 14 operating facilities. WCMN-LD's transmission system includes a custom bandpass filter which, as shown in Appendix A, attenuates all signals from WCMN-LD below 470 MHZ by at least 59 dB below the peak carrier.

Based on a search of the FCC Universal Licensing System all land mobile receivers operating in the 460-470 MHZ band within a 20 kilometer radius of the authorized WCMN-LD site were identified. Appendix B includes data on the 46 land mobile stations which were identified by this search. The licensees of each of these stations were contacted regarding the equipment tests being conducted by WCMN-LD

and asked to notify the WCMN-LD's contact representative if they experienced any interference. Based on the responses which were received, no such interference appears to be occurring.

Based on the above information, the permittee of WCMN-LD has fully complied with the special operating condition on its construction permit to identify and resolve any cases of interference to land mobile radio facilities operating in the 460-470 MHz band and is requesting the grant of program test authority.
