**Re: Oregon Public Broadcasting  
Request for Change in Facility Service Type From Low Power Digital TV to  
Digital TV Translator**

**K19EC-D, Mapleton, OR (Facility ID No. 50612)**

Dear Ms. Dortch:

On behalf of noncommercial educational licensee Oregon Public Broadcasting (OPB), I hereby request that the Commission update its records to properly reflect that K19EC-D, Mapleton, OR (Facility ID No. 50612) is a TV Translator station.<sup>1</sup> The primary station for K19EC-D is OPB's KEPB-TV, Eugene, OR (Facility ID No. 50591).

Please direct any questions regarding this request to the undersigned.

Sincerely,

Brad C. Deutsch  
*Counsel to Oregon Public Broadcasting*

<sup>1</sup> The inaccurate designation of K19EC-D as a Low Power TV station in both CDBS and LMS appears to be the result of a 2010 application filed by OPB for a license to cover K19EC's digital flash-cut construction permit (CDBS File No. BLDTL-20100223ACV). In that license to cover application, it appears that OPB inadvertently selected the wrong box, and the station has been erroneously designated as a Low Power TV station ever since.
