

Translator Operational Status Certifications:

K03FW-D, K13TR-D, and K35NZ-D are operated as translator stations and as such are not required to file an EEO Program Report or EEO Public File Reports. Each station rebroadcasts the signal of commonly-owned station KYUR, Anchorage, Alaska and as a result no written agreements exist, or are required, for such retransmission.

Station K35NZ-D has been silent since December 1, 2021 due to equipment failure in one of the Station's transmitter power amps (See LMS File No. 0000176767). Licensee is working to return the station to operation.
