

AMENDMENT TO WBKB-TV ANNUAL CHILDREN'S TELEVISION REPORT  
FOR 2021

WBKB-TV ("the Station") filed its Annual Children's Television Report for 2021 on a timely basis (January 28, 2022).

At the direction of FCC staff, the Station submits this amended Annual Children's Television Report for 2021. This amended report corrects the total number of hours of regularly scheduled weekly Core Programming on the main program stream and on multicast streams, which confirms that the Station far exceeds the Core Programming safe harbor processing guidelines.

In the Program Listings detail, the amended report now differentiates between the educational/informational ("E/I") programs that were aired during core hours (6 am to 10 pm) on the Station's main channel and the E/I programs that were aired during core hours on the Station's two multicast channels and corrects for each program listed the total number of airings and the number of hours per quarter. Additionally, the original report inadvertently omitted the weekly airing of "Teen Kids News" on the main programming stream and "Think Big" on a multicast programming stream. These omissions are corrected in this amended report, such that the number of E/I programs listed in the report is increased to 22 (instead of 20 on the original report).
