

Silent Justification  
K222CV

The management of the Mt. St. Helena site changed hands on November 1<sup>st</sup> from ComSites West to Peter Gruchawka. ComSites West decided to close its business operations. As a result of the change in management of the site, the antenna system for K222CV and its transmitter and feedline were requested to be taken down by October 31<sup>st</sup>. A new site for K222CV has been located on Mt. Veeder to the south. A minor modification to move to the new site was filed on November 1<sup>st</sup>. Provided the FCC grants the minor modification to move to the new site, then the applicant will construct K222CV at its new site location.
