RE: Picabo Mountain Antenna Orientation Survey Certification

To Whom it may concern,

On September 29th, 2022, our field surveyor, under my responsible charge, surveyed the upper and lower antenna stem of the KXCD FM antenna at the top of Picabo Mountain and found both the upper and lower stem to be oriented, to the nearest degree, at 270° true. The basis of bearings for the survey is S58°24'06"E between Blaine County GIS control point "G1/MAIN" and Blaine County GIS control point "BMS13".

Sincerely,

Mark E. Phillips, PLS
Survey Manager
