

Extraordinary Circumstances Requiring Silence

K263BC went silent on December 20, 2022, due to the fact that its transmitter site had been sold, and the new owner decided to demolish the tower on which the K263BC transmitting antenna was mounted in order to build another structure on the lot. The licensee is seeking another transmitter location and plans to file a modification application and, upon its grant, return K263BC to operation. In the interim, authority for K263BC is hereby requested.
