

TRANSLATOR COVERAGE AREA

The proposed assignment includes the following FM translators: K227DQ, K248AI, K278GE, K248DQ, K258AD, K252EJ. As shown below, while three of these translators provide “fill-in” service, the remaining three have contours that extend beyond their respective AM or FM primary station contours. However, as shown below, the three remaining translators serve commercial white areas.

It also should be noted that when originally granted, one of these translators (K252EJ) was allowed to have coverage outside of the contour of their primary stations pursuant to a request for waiver.

| Trans. Call Sign | Primary Station | Fill-In | White Area/Prior Waiver |
|---------------------|-----------------|---------|-------------------------|
| K248DQ | KJNO(AM) | Yes | |
| K227DQ | KTKN(AM) | Yes | |
| K248AI | KGTW(FM) | Yes | |
| K278GE | KINY(AM) | No | White area |
| K258AD | KGTW(FM) | No | White area |
| K252EJ | KGTW(FM) | No | White area/Prior Waiver |

It also should be noted that three of the above translators – K278GE, K258AD, and K252EJ, currently receive the signal of the primary station via the Internet.
