To Whom It May Concern:

LPTV Station KJOU-LD has recently experienced some transmitter and antenna system problems which require the substitution of a different transmitter and antenna system. The substitution of a different antenna and transmitter results in a different antenna pattern and a reduction of ERP to 210 watts. While this is a temporary situation, KJOU-LD is also implementing and commissioning equipment for its construction permit with file #0000203905. So it is believed that the STA may be needed for a few months until the construction permit is completed.

Sincerely,

A handwritten signature in black ink that reads "Greg Best, PE". The signature is written in a cursive, flowing style.
