

**FCC Form 2100, Schedule 303-S**  
**Online Public Inspection File**

New Jersey Public Broadcasting Authority (NJPBA), licensee of noncommercial educational television station WNJS(TV), certifies to the best of its knowledge and belief that the station's online public inspection file is complete with all required items, and that all items were timely added to the public file. NJPBA notes that one (1) quarterly issues and programs list, for 3<sup>rd</sup> quarter 2016, is shown in the online public file with a late upload date of October 18, 2016; however, as explained in a memorandum to file uploaded to the WNJS online public file on October 18, 2016, NJPBA had uploaded the 3<sup>rd</sup> quarter 2016 list to another of its stations' online public files on October 7, 2016 and attempted to upload for WNJS on October 7, 2016 but was unable to do so due to a technical error on the FCC public file site. As detailed in that memorandum, NJPBA contacted FCC technical support at that time and continued to monitor the situation. In the following days, NJPBA and its legal counsel contacted FCC technical support again for updates. NJPBA was notified on October 17, 2016 that the technical error was to be corrected by October 18, 2016, and NJPBA was able to complete the 3<sup>rd</sup> quarter list upload on October 18<sup>th</sup>. Given these circumstances as timely documented in the station's public file, NJPBA submits that WNJS has been compliant with the public inspection file requirements throughout its license term.
