

### **Reason for STA Extension**

Mollman Media, Inc., licensee of KKEN(FM), Duncan, Oklahoma requests an extension of its current STA. The issues with the antenna are ongoing and the licensee is currently working through a solution. The KKEN antenna system is not resonant at its current frequency. The licensee is currently operating at 3000 watts TPO of the 5100 watts KKEN is authorized for. The licensee respectfully requests an extension of its current STA while the mistuned antenna issue can be addressed and the listeners in Duncan will continue to be served.
