

Silent Period

Station was on Silent STA 10/17/2013-10/15/2014 and 08/23/2018-02/20/2019 for technical reasons--facility was displaced by co-channel full power KYMS. Spokane's secondary service channels are filled almost exclusively by FM translators, without a replacement LPFM channel available. Just recently, a channel-change arrangement was found.
