

Reason for STA Extension

SM-KYQQ, LLC (“Licensee”), licensee of KYQQ (FM) (the “Station”), respectfully requests an extension of this Special Temporary Authority to continue operating the Station at 30% of its licensed power. The Station antenna has not been fully repaired and is still causing high Voltage Standing Wave Ratio (“VSWR”). Operating at reduced power is necessary to prevent VSWR overload from shutting down the transmitter while Licensee seeks a replacement component and arranges repairs. Licensee will notify the Commission expeditiously with any updates.
