

SUPPLEMENTAL STATEMENT

Calipatria Broadcasting Company, LLC (“Calipatria”) wishes to take this opportunity to clarify the Statement that it submitted on December 12, 2022, as an amendment to the Station’s renewal of license application, dealing with violations of the children’s television programming commercial limits rules in UniMas Network programming during the period from November 15, 2017 through February 15, 2018.

As explained in its Statement, Calipatria was not informed by the Network at the time the violations may have occurred, and there was no reference to any such violations in the quarterly certifications from the Network to Calipatria for Q2 of 2017 and Q1 of 2018. The Network also did not at any point submit to Calipatria amendments to its commercial limits statements speaking solely to the applicable violations and specifying the applicable calendar quarters.

In its Commercial Limits Certification for Q4 of 2018, after first stating that the commercial limits were complied with for that calendar quarter, the Network included a statement that it had not been in compliance with the commercial limits for the 2017 and 2018 calendar quarters in the *Pokemon* programming it provided to its affiliates. Calipatria inadvertently overlooked this information due to the manner in which it was presented and only recently became aware of the potential inaccuracy in its previously submitted certifications. Due to the passage of time, Calipatria is not able to independently determine if any violations actually occurred, nor can it take any actions to remediate them. Nevertheless, Calipatria promptly updated the Station’s online public inspection file upon becoming aware of the information from the Network.
