**Attachments:** RE: Return of WIIC-LD to the air at half power

Ron and Ben,

Mark is currently in and out of the office, so he forwarded on this e-mail. At this time the displacement application is not actionable. In order to proceed we need some additional information about the Station's operational history. It was reported to us back in the Fall of 2019 that the station was causing interference and needed to either go silent or operate at reduced power. Attached is a chain that Mark and Hossein had with Ben on the matter. Can one of you please shed some light on the Station's operations since September 2019? Has the Station been silent (and if so for how long) or has the station been operating at reduced power or parameters other than what is authorized in its license (and if so, under what authority and parameters)?

Please confirm receipt of this e-mail and if your response does not provide a response to our inquiry please provide a timeline by which we can expect a reply.

Evan

Mark

Hope you had a great holiday!

I am helping Ben Perez move WIIC-LD to its new location and Channel as applied for in his displacement application. It seems like I can't do this because the displacement application is not granted yet. Is this correct or can we start the buildout?

Thanks

**Ron Bruno**
