W255BO 98.9 SCRANTON MODIFICATION OF LICENSE APPLICATION INFORMATION

This License Modification Amendment was filed to correct the main address.

It should be noted that this FM Translator will continue to rebroadcast commercial AM station WQOR, Olyphant, PA (Fac. ID number 8092).

This License Modification is being filed to adjust the transmitter power output to 332.4 watts which has been changed because of the installation of a new antenna power divider which has a loss of 0.46 dB, a change from the original power divider. There is no change to the antenna pattern.

The LMS system does not have an antenna pattern rotation field. The antenna pattern shown in the LMS needs to have a plus 15 degree rotation. This is still correctly indicated in the FM Query database and was originally represented in the CDBS database.
