

W259CZ Silent STA Extension Request

W259CZ went silent on 8/26/2022 to facilitate the move of the facility to a new location pursuant to a Construction Permit (LMS#0000192056). While Licensees is prepared to relocate the equipment from the existing location to the new site specified in the above CP, it only just received its “No Hazard Determination” from the FAA after a long delay, which was one of the prerequisites of construction, and is awaiting local building permits before construction can commence of the new facility. Licensee expects to receive same in next few months and will complete reconstruction and file license to cover prior to 1 year of silent authority.
