Subject: 0000210802 - TVStudy

Good afternoon,

I began to review 0000210802 (W22FA-D) and found that it specifies a profile increment of 0.03 km. To date, I do not believe that we have accepted an increment smaller than 0.05 km, because we believe that the underlying terrain data does not provide enough resolution to support an increment smaller than that. Please amend your application to specify a profile increment of 0.05 km or larger.

You have 30 days to amend the application and resolve the issue or it will be dismissed.
