Digital to Digital Replacement Television Translator Station Application for Minor Modification of Construction Permit

prepared for

Gray Television Licensee, LLC

WVIR-TV Charlottesville, VA

DTDRT Madison, VA

Facility ID 70309

Ch. 30 15 kW Directional

Gray Television Licensee, LLC (“*Gray*”) is the licensee of television station WVIR-TV, Channel 2, Charlottesville VA, Facility ID 70309. *Gray* is authorized by a Construction Permit (“CP” file# 0000130293) to construct a new digital-to-digital replacement translator (“DTDRT”) facility on Channel 30 for WVIR-TV to aid in serving communities in the region of Madison, Greene, Orange, Culpeper, and Louisa Counties Virginia. The DTDRT facility is authorized to operate at 15 kW effective radiated power (“ERP”) with a directional antenna centered 82.9 meters above ground level (“AGL”). It has been determined that other appurtenances on the tower obstruct the authorized antenna height. *Gray* herein seeks a modification of the CP to specify a slight increase of 4.0 meters in the authorized antenna height, to 86.9 meters AGL.

No change in site location, ERP, antenna, or directional antenna pattern is proposed. As with the current CP, the proposed facility will employ a new antenna system to be side-mounted on the tower structure associated with FCC Antenna Structure Registration number 1026298. This tower structure is atop Clark Mountain and located 55.5 km from the WVIR-TV Channel 2 site. No change to the overall structure height is proposed.

The proposed ERP is 15 kW using a “full service” out of channel emission mask. The proposed antenna is a directional Dielectric model TLP-12W/VP-R having elliptical polarization (30 percent vertical power). The maximum horizontally polarized ERP is 15 kW and the maximum vertically polarized ERP is 4.5 kW. A plot of the directional antenna’s azimuthal pattern is supplied in Figure 1.

Figure 2 depicts the 51 dB μ coverage contour of the proposed DTDRT Channel 30 facility, which does not extend beyond the WVIR-TV pre-auction¹ Channel 32 protected service area. Considering the 4.0 meter increase in antenna height, the proposed DTDRT 51 dB μ coverage contour expands past that of the authorized DTDRT facility by only 0.2 km (not shown on Figure 2 for clarity). The use of the authorized DTDRT site and the negligible change in coverage contour complies with §74.787(b) for a minor modification of the CP.

Interference study per OET Bulletin 69² shows that the proposal complies with the FCC's interference protection requirements toward all digital television, television translator, LPTV, and Class A stations. The results, summarized in Table 1, show that any new interference does not exceed the FCC's interference limits (0.5 percent to full power and Class A stations, and 2.0 percent to secondary stations) to any facility.

Human Exposure to Radiofrequency Electromagnetic Field (Environmental)

The proposed facility was evaluated for human exposure to RF energy using the procedures outlined in the FCC's OET Bulletin Number 65. Based on OET-65 equation (10) and 15 percent antenna relative field in downward elevations (pattern data shows 15 percent or less relative field at angles 15 to 90 degrees below the antenna), the calculated power density attributable to the proposed facility at locations near the transmitter site at a height of two meters above ground level is 2.0 μ W/cm², which is 0.5 percent of the general population / uncontrolled maximum permissible exposure limit. This is well below the five percent threshold limit described in §1.1307(b) regarding sites with multiple emitters, categorically excluding the applicant from responsibility for taking any corrective action in the areas where the proposal's contribution is less than five percent.

¹WVIR-TV was reassigned from Channel 32 to Channel 2 in the *Incentive Auction Closing and Channel Reassignment Public Notice* ("CCRPN", DA 17-317, released April 13, 2017).

²FCC Office of Engineering and Technology Bulletin number 69, *Longley-Rice Methodology for Evaluating TV Coverage and Interference*, February 6, 2004 ("OET-69"). This analysis employed the FCC's current "TVStudy" software with the default application processing template settings, 1 km cell size, and 1.0 km terrain increment. Comparisons of various results of this computer program (run on a Mac processor) to the FCCs implementation of TVStudy show excellent correlation.

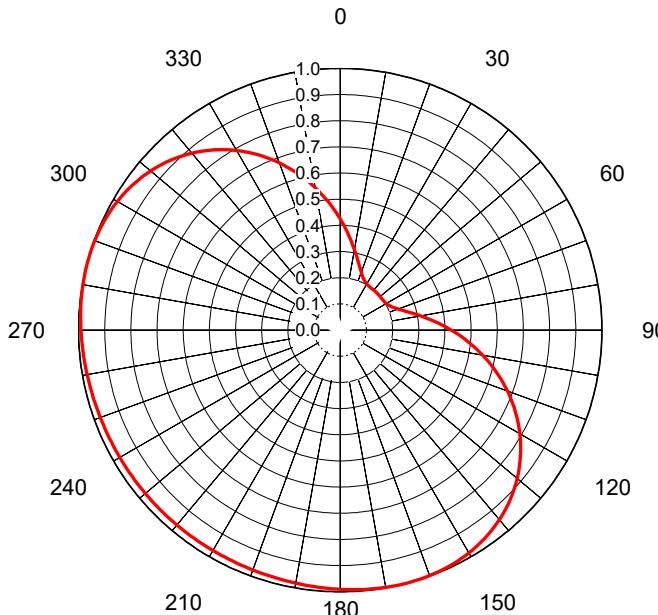

The general public will not be exposed to RF levels attributable to the proposal in excess of the FCC's guidelines. RF exposure warning signs will continue to be posted. With respect to worker safety, the applicant will coordinate exposure procedures with all pertinent stations and will reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from RF electromagnetic field exposure in excess of FCC guidelines. This exhibit is limited to the evaluation of exposure to RF electromagnetic field. No increase in structure height is proposed.

Channel and Facility Information

Section	Question	Response
Proposed Community of License	Facility ID	70309
	State	Virginia
	City	Madison
	DRT Channel	30
	Designated Market Area	Charlottesville

Section	Question	Response
Antenna Structure Registration	Do you have an FCC Antenna Structure Registration (ASR) Number?	Yes
	ASR Number	1026298
Coordinates (NAD83)	Latitude	38° 18' 39.0" N+
	Longitude	078° 00' 12.3" W-
	Structure Type	LTOWER-Lattice Tower
	Overall Structure Height	117.3 meters
	Support Structure Height	110.9 meters
	Ground Elevation (AMSL)	326.7 meters
Antenna Data	Height of Radiation Center Above Ground Level	86.9 meters
	Height of Radiation Center Above Mean Sea Level	413.6 meters
	Effective Radiated Power	15 kW

Antenna Technical Data	Section	Question	Response
	Antenna Type	Antenna Type	Directional Custom
		Do you have an Antenna ID?	Yes
		Antenna ID	1007735
	Antenna Manufacturer and Model	Manufacturer:	Dielectric
		Model	TLP-12W/VP-R
		Rotation	225 degrees
		Electrical Beam Tilt	1.0
		Mechanical Beam Tilt	Not Applicable
		toward azimuth	
		Polarization	Elliptical
	Elevation Radiation Pattern	Does the proposed antenna propose elevation radiation patterns that vary with azimuth for reasons other than the use of mechanical beam tilt?	No
		Uploaded file for elevation antenna (or radiation) pattern data	
		Out-of-Channel Emission Mask:	Full Service
