

Renewal Amendment

For many years, the Licensee contracted with Mr. Lonnie England to provide technical support and ensure FCC compliance and filings for the station. Mr. England was incarcerated in May 2021, thus the licensee was unaware that the station license renewal deadline had passed and it received no notifications because the email on file with the Commission was that of the incarcerated individual. As soon as the president of the licensee, Mr. Pratt, was made aware by the Washington State Association of Broadcasters of the missed deadline, he immediately worked to retain FCC counsel and filed the license renewal application expeditiously. Licensee intends to retain FCC counsel to advise going forward to ensure regulatory compliance and has updated contact information with the FCC to ensure prompt receipt of any communications.
