

K227AN, Lynd, MN (Fac. Id. 139168)
Silent STA Justification

On March 30, 2023, an ice storm caused a total shut down of the K227AN site, and it is believed that the antenna is damaged and will have to be replaced. UNWSP will soon be able to evaluate the extent of damage, and will then undertake to consider the long-term viability of this station as it considers repair costs. As a result, the station requests authority to remain silent for 180 days until such time as an evaluation can be completed and options considered.
