Amendment

Amend STA request to specify operation at 34 watts ERP.

As demonstrated in the exhibit, the higher power will cause the 60 dBu service contour to extend outside the licensed 60 dBu service contour but only over unoccupied area and in the Gulf of Mexico.

As further demonstrated, due to the differences in how the F(50,50) and F(50,10) curves are calculated, the proposed amendment will still result in a net decrease of overlap of the 34 dBu interfering contour over Mexican territory.
