

FCC Form 2100, Schedule 303-S
Online Public Inspection File

Mountain Lake Public Telecommunications Council (MLPTC), licensee of noncommercial educational television station WCFE-TV certifies to the best of its knowledge and belief that the station's online public inspection file is complete with all required items, and that all items were timely added to the public file. MLPTC notes that one (1) quarterly issues and programs list, for 2nd quarter 2016, is shown in the online public file with a late upload date of October 3, 2016; however, the WCFE-TV online public file history listings show that the 2nd quarter 2016 issues and programs list was originally timely uploaded on July 8, 2016, and then deleted October 3, 2016 when the current version was uploaded. Based on the public file history, MLPTC believes that this document was originally timely uploaded, and then appears to be have been replaced with a corrected version three months later.
