WXYX(FM), Rincon, Georgia
Request for Extension of STA

STA Extension Request

June 2023 Update: For the reasons described in the underlying STA (LMS File No. [0000204494](#)), the Licensee continues to operate WXYX(FM) from emergency facilities at 8500 watts from a four-bay antenna at 133 meters HAAT.

The damaged antenna has been repaired and returned from the manufacturer to the Licensee. A tower crew to reinstall the repaired antenna has been contacted; however, scheduling of the installation has proven problematic and has not yet occurred. The Licensee anticipates being back to full, licensed operations within 45 days, but respectfully requests an STA extension of 180 days to account for any unforeseen issues.

Extension of STA will allow the Licensee the opportunity to continue serving the public.
