

Engineering STA Exhibit

Your Christian Companion Network, Inc. (YCC) requests special temporary authority to operate FM NCE station KYCM at reduced power. The station was originally forced off the air as a result of equipment failure. YCC was able to return the station to operation but at reduced power. It is uncertain exactly how long it will take until YCC can restore KYCM to full power operations, but YCC is working to determine and remedy the cause of the failure of the new equipment. A grant of this request is in the public interest as it permits YCC to continue its unique programming to its listeners.
