

### Primary Station Fill-in Change

The construction of K283AR has been completed per the specifications found in construction permit 0000204859 with the exception of the primary station designation. The construction permit specified the primary station as KKXX(AM) (Facility ID 7909), Paradise, CA. K283AR has been constructed with the primary station of KYIX (Facility ID 7914), South Oroville, CA. K283AR will operate as a fill-in of KYIX-HD3.

K283AR is collocated with co-owned K289CH (Facility ID 147123), Chico, CA. K289CH is also a fill-in of KYIX and will operate on KYIX-HD2 with a different format from K283AR operating on KYIX-HD3.

The below map demonstrates that the 60 dBu contour of K283AR as proposed will be completely encompassed within the KYIX 60 dBu contour and thus meets the required criteria for fill-in status.
