

ATTN: FCC     REQUEST FOR EXEMPTION FROM FCC FILING FEES

From the very beginning of broadcasting in 1990, Blue Mountain Broadcasting Association has been classified in the State of Washington as a non-profit organization for the sole purpose of operating a non-profit, viewer supported religious/educational television station in the Walla Walla Valley. The Internal Revenue Service granted us tax-exempt status based on the guidelines of 501(c)(3), and that our media produced is of an educational nature.

This small Class A station does not have any connection with any commercial broadcast station, and we do not derive any income from advertising. We are solely dependent on contributions from members of our community for our financial support. Since all broadcast programming content is of a non-commercial, educational, religious nature, we hereby respectfully request exemption from FCC filing fees.
