

Description of Transaction

This application is filed to report gradual changes in the board of Educational Media Foundation ('EMF'), licensee of the broadcast facilities listed in this application. The gradual turnover of EMF's board of directors could be considered to be a transfer of control requiring FCC permission. EMF is a non-stock, nonprofit corporation that is governed by a self-perpetuating board of directors. Given the fact that the Commission has passed on the qualifications of the majority of the members of EMF's board of directors in connection with the numerous assignment applications filed with the Commission in the past 3 years, these board members have already been 'passed on' by the FCC. Nevertheless, this application is being filed out of an abundance of caution.

The addition of new board members and removal of other board members will mean that a majority of the board will have changed since the last application for approval of a transfer of control of the entire company was approved on February 3, 2020. See FCC File No. BTCED-20191227AAF.

There is no written contract providing for the transfer and no consideration has been or will be paid or received in connection with the transfer. This is merely the result of a gradual change in the control of a nonprofit, non-stock corporation.
